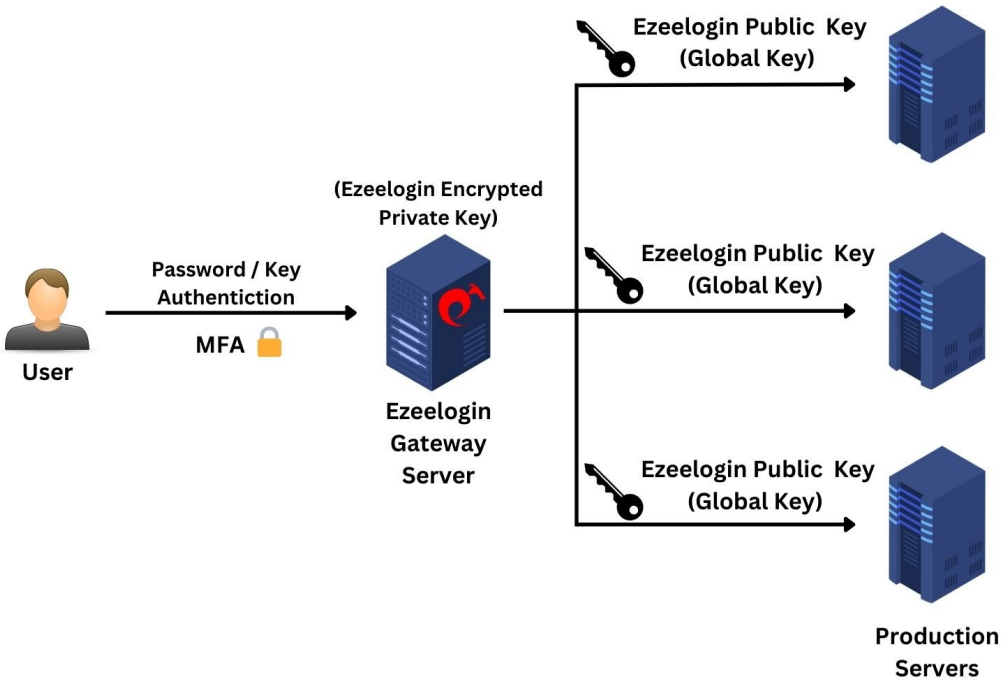
Setup Public Key in Remote Server

631 Nesvin KN October 2, 2023 Features & Functionalities 746

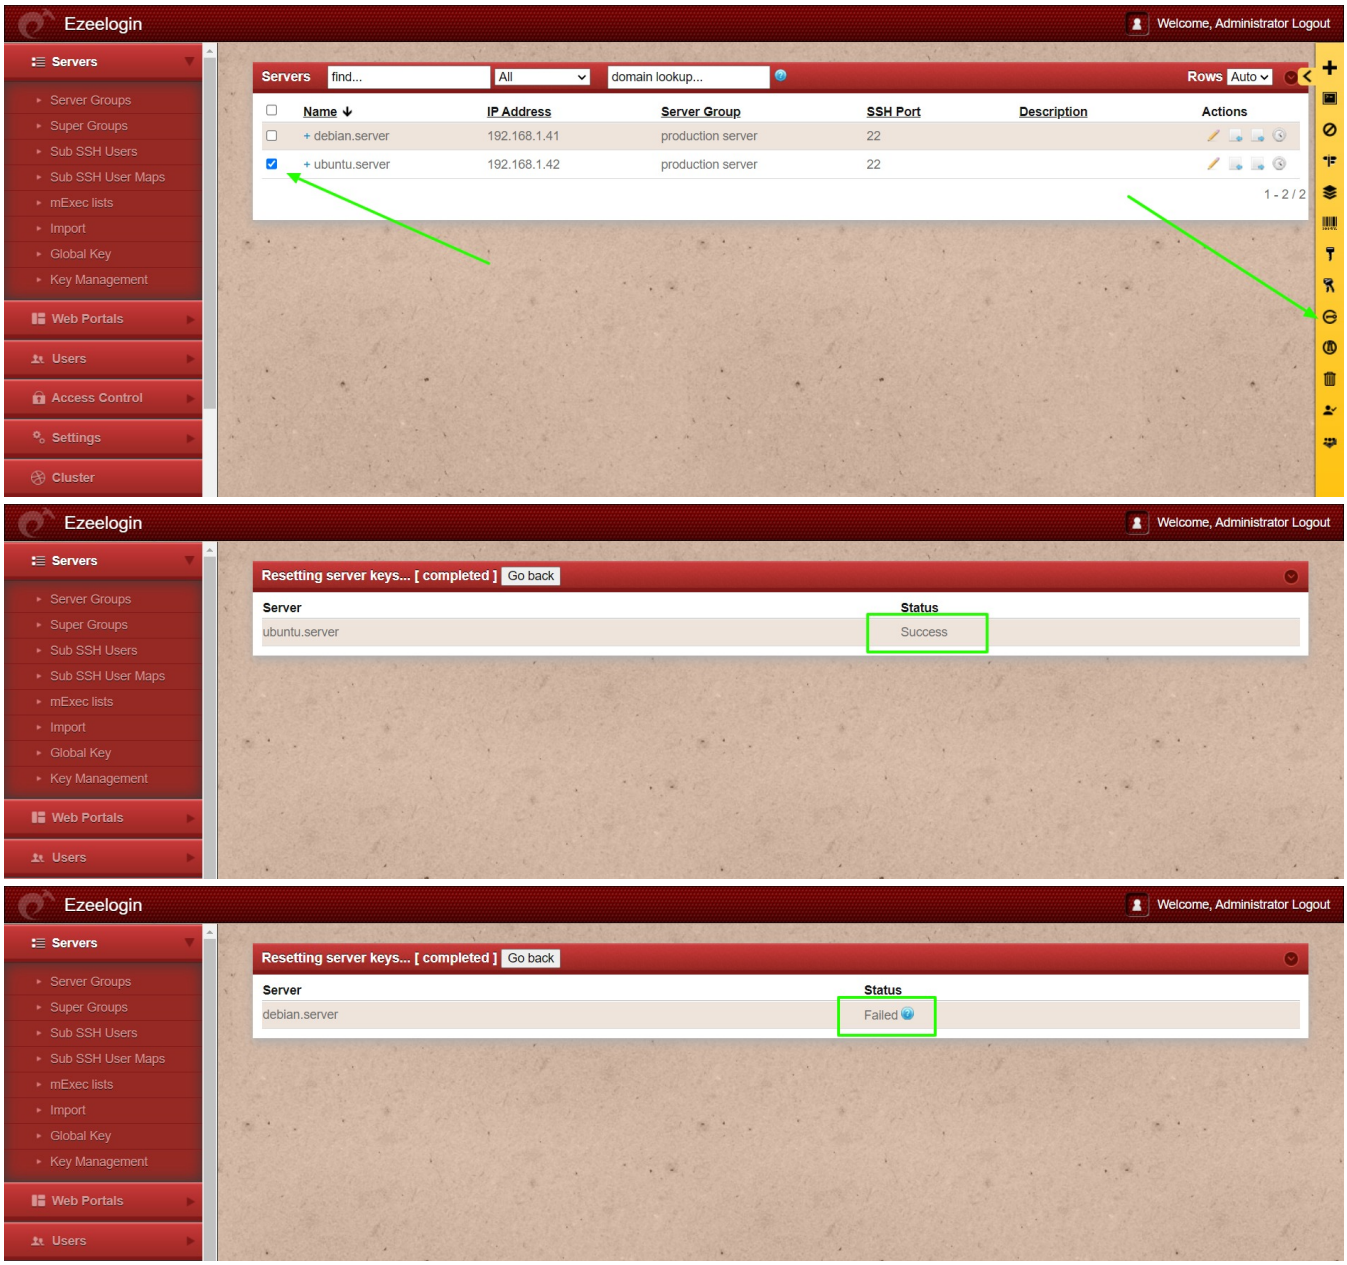
How to setup Ezeelogin public key (global key) in the remote server?



Ezeelogin's public key or global key is used to SSH into the remote servers. The private key corresponding to the public key is encrypted and stored in Ezeelogin and cannot be retrieved.

- **How to setup the Ezeelogin public key to a single remote server?**

Login to **Ezeelogin GUI** -> select the **remote server** -> click on **Setup SSH key on selected server** to copy Ezeelogin public key.



Success: Public key was successfully copied to the remote server.

Failed: Public key failed to copy to the remote server. (Verify the server logins and try again)

- **How to setup the Ezeelogin public key to all remote servers?**

Login to **Ezeelogin GUI** -> click on **Setup SSH key on all servers** to copy Ezeelogin public key.
