

Can we use the same RDS instance since it is multi-AZ

635 Rakhi September 13, 2023 [Common Errors & Troubleshooting](#) 587

Can we use the same database instance for cluster setup?

No, we cannot. We must use 2 dedicated databases for both primary and secondary nodes.

This would be the error received if a single database or mysql instance is used to set up cluster nodes.

Error: Database already exists: ezlogin_cmmtnn. You may want to update the primary first.

```
Checking SSH access to other node (enter password when prompted)...
The authenticity of host '192.168.0.114 (192.168.0.114)' can't be established.
ECDSA key fingerprint is SHA256:cEoQW/wyQWm654Cer+Xl17/4NX6X5WCjF4ET9oTlISc.
Are you sure you want to continue connecting (yes/no/[fingerprint])? yes
root@192.168.0.114's password:
