

How to add ControlPanels

Adding ControlPanels

Overview: This article helps gateway users in adding and accessing various control panels in Ezeelogin.

Control Panel is a web-based interface that is used for server management. Examples of control panels are Cpanel, Plesk, Webmin, etc. For adding a control panel request URI is enough. A control panel is needed to add once, also we can select the control panel at the time of adding or editing the server, When we are accessing the control panel it uses the details of the server to which the control panel is added.

Here are the multiple ControlPanels that can be added. These portals can also be added as [web portals](#).

1. How to add CPanel/WHM as ControlPanel?

1(A): Refer to the screenshot below to add **CPanel/WHM** as ControlPanel.

4(A): Refer to the screenshot below to add **Webmin** as ControlPanel.

The screenshot shows the Ezeelogin interface with the 'Settings' menu on the left. The 'Control Panels' sub-menu is selected. The 'Add Control Panel' form is displayed with the following fields:

Name	Description
Webmin	Webmin control panel

Port: 10001

Request URI: /session_login.cgi

Username Field: user

Password Field: pass

Protocol: HTTPS (Note: HTTPS is highly recommended.)

Request Method: POST

Username: root

Extra Variables: cGFnZT0lMkY=

Auth Type: Basic

Buttons: Cancel, Save

4(B): Refer to the screenshot below to add **Webmin insecure** as ControlPanel.

The screenshot shows the Ezeelogin interface with the 'Settings' menu on the left. The 'Control Panels' sub-menu is selected. The 'Add Control Panel' form is displayed with the following fields:

Name	Description
Webmin insecure	Webmin control panel without SSL

Port: 10000

Request URI: /session_login.cgi

Username Field: user

Password Field: pass

Protocol: HTTP (Note: HTTPS is highly recommended.)

Request Method: POST

Username: root

Extra Variables: cGFnZT0lMkY=

Auth Type: Basic

Buttons: Cancel, Save

5. How to add SolusVM as ControlPanel?

5(A): Refer to the screenshot below to add **SolusVM** as ControlPanel.

Add Control Panel

Name: SolusVM

Description: SolusVM Virtual Server Control Panel

Port: 5056

Protocol: HTTPS

Note: HTTPS is highly recommended.

Request URI: /admincp/login.php

Request Method: POST

Username Field: username

Password Field: password

Extra Variables: bGFuZ3VhZ2U9RW5nbGlzaCZTdWJtaXQ9TG9naW4=

Auth Type: Basic

Cancel Save

5(B): Refer to the screenshot below to add **SolusVM insecure** as ControlPanel.

Add Control Panel

Name: SolusVM insecure

Description: SolusVM Virtual Server Control Panel without SSL

Port: 5353

Protocol: HTTP

Note: HTTPS is highly recommended.

Request URI: /admincp/login.php

Request Method: POST

Username Field: username

Password Field: password

Extra Variables: bGFuZ3VhZ2U9RW5nbGlzaCZTdWJtaXQ9TG9naW4=

Auth Type: Basic

Cancel Save

6. How to add DirectAdmin as ControlPanel?

Refer to the screenshot below to add **DirectAdmin** as ControlPanel.

Add Control Panel

Name: DirectAdmin

Description: DirectAdmin web control panel

Port: 2222

Protocol: HTTPS

Note: HTTPS is highly recommended.

Request URI: /CMD_LOGIN

Request Method: POST

Username Field: username

Password Field: password

Extra Variables: cmVmZXJlcj0v

Auth Type: Basic

Cancel Save

After Adding the control panel accordingly, navigate to the **Servers tab** and select the control panel from the drop-down menu. Refer below screenshot for example:

Note that If the control panel is installed on another/seperate server, make sure to provide the control panel details under Advanced section. Mention control panel user, control panel password, and control panel host details. Then click on "Save." Refer to the screenshot below as an example:

Refer to the article on how to [grant users access](#) to the Control Panel.

Click on the control panel icon to access any of the control panel that you have added.

Name	IP Address	Server Group	SSH Port	Description	Actions
+ Alphaserver	192.168.0.120	CollectiveTech	22		[Edit] [Add] [Delete] [Refresh]
+ CosmosNetServers	192.168.0.105	CollectiveTech	22		[Edit] [Add] [Delete] [Refresh]
+ HorizonCloud	192.168.0.109	CollectiveTech	22		[Edit] [Add] [Delete] [Refresh]
