How to change mapped sub ssh group

645 Rakhi April 15, 2025 Common Errors & Troubleshooting 3554

CHANGE MAPPED SUBSSH GROUP

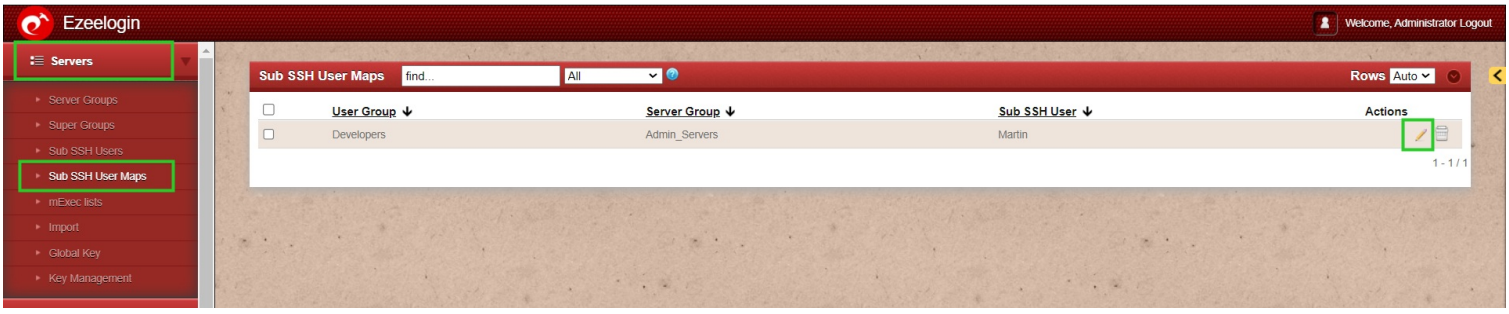

Overview: This article explains how to change the mapped group of a Sub SSH user in Ezeelogin and outlines the effect of changes on active SSH sessions.

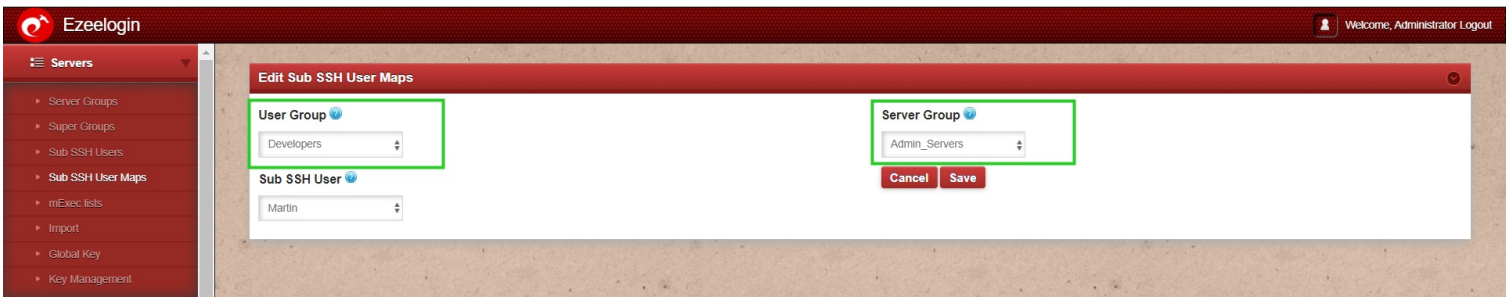

For instance, currently, the **Sub SSH user** Martin is under User Group Admin_Servers.

To change the user group of mapped sub ssh user.

Click under **Server section -> Sub SSH User Maps -> Edit -> Change Group of Sub SSH user.**

What happens when you attempt to alter group mapping while there are active sessions in progress?

The modifications to the group mapping will not affect the current session; they will only become effective upon the next login.
