

How to change mapped sub ssh group

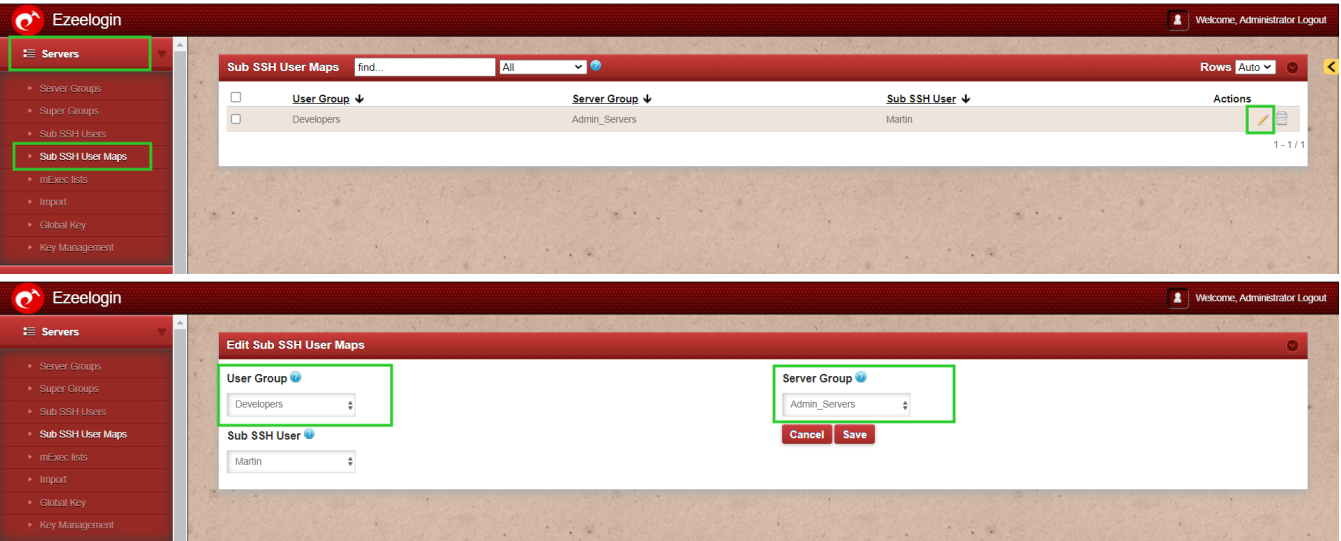

CHANGE MAPPED SUBSSH GROUP

For instance, currently, the [Sub SSH user](#) Martin is under User Group Admin_Servers.

To change the user group of mapped sub ssh user.

- (1) Click under Server section > Sub SSH User Maps > Edit > Change Group of Sub SSH user.

```
Server details
Name      : Admin_holders5689
IP        : 192.168.0.114
SSH port  : 22
Sub SSH User : Martin
Password  : K){$5TaKV7[$]{hU9!y8UP{w*f*AWwQ
Actual SSH User : root
Actual Password : test
SSH Key    : Press space to show key
Passphrase : Tf{!hJ[F7mxfk)nbA]]n$yzFBMnE7
Group      : Cloud_Servers

Press any key to continue...[]

SERVERS [Cloud_Servers] (group) [Normal / ]
Start typing string to locate. ESC: Clear search, F1/+: Help, F4/! : Exit.
Menu | Ezeelogin | SSH CONNECTION ESTABLISHED
```

What happens when you attempt to alter group mapping while there are active sessions in progress?

The modifications to the group mapping will not affect the current session; they will only become effective upon the next login.
