## List user and subssh user mapped

647 Nesvin KN April 16, 2025 Productivity & Efficiency Features 1858

## How to list the usernames and the corresponding subssh users mapped individually?

**Overview:** This article helps to retrieve the list of gateway users and their corresponding subssh users configured in Ezeelogin.

**Step 1:** Run below command to find the database name and table prefix.

```
root@gateway:~# cat /usr/local/etc/ezlogin/ez.conf | grep -i
"db_name|db_prefix"

db_name ezlogin_wupluh

db_prefix btu_
```

**Step 2:** Login to the MySQL and run the query below to list the usernames and the corresponding subssh users mapped individually from the user edit.

```
root@gateway:~# mysql -u root -p
Enter password:
mysql> use ezlogin_wupluh;
mysql> select u.username as user, s.username as sub_ssh_user from
btu_users as u join btu_ssh_users as s on u.ssh_user_id = s.id;
+-----+
| user | sub_ssh_user |
+-----+
| alex | john |
| tony | nick |
+-----+
2 rows in set (0.00 sec)

Replace the database name (ezlogin_wupluh) and table prefix (btu_)
with your own values.
```

Execute the following command and provide the MySQL root password when prompted to get the list

## with a single command.
