

# Login into the gateway server as a gateway user with bash shell

664 Jisna Joseph December 29, 2023 [General](#) 650

## How to login into the gateway server as a gateway user with Bash shell?

1. Add a [gateway user](#) in ezeelogin
2. **Change the shell of the gateway user to /bin/bash.**

3. Run the below command to **confirm the shell of the gateway user.**

4. Edit the sshd configuration file of the gateway server and **add a new port number and force the user to use the ezsh shell with default port 22.**

Refer article to [assign a new port number and force to use the different shell of the Linux user.](#)

5. **Add the gateway server** to the Ezeelogin GUI as the remote server **with the new port number.**  
Refer below screenshot.

6. Login to ezsh and press the tab key to view the server details. Refer below screenshot.

```
Server details
Name           : gateway.server
IP             : 127.0.0.1
SSH port       : 2233
SSH User       : alex
Password       : Mrr^FNguk#LV@D!r5@7
Group          : gateway server
```

7. Login to the server, and the gateway user will be **logged in with the bash shell on the gateway server**.

```
alex@gateway:~$
alex@gateway:~$
alex@gateway:~$
alex@gateway:~$
```
