

How to grant a user access to control panel

67 admin September 28, 2023 [Features & Functionalities](#) 4424

How do I grant access to users to control panel?

Control Panel

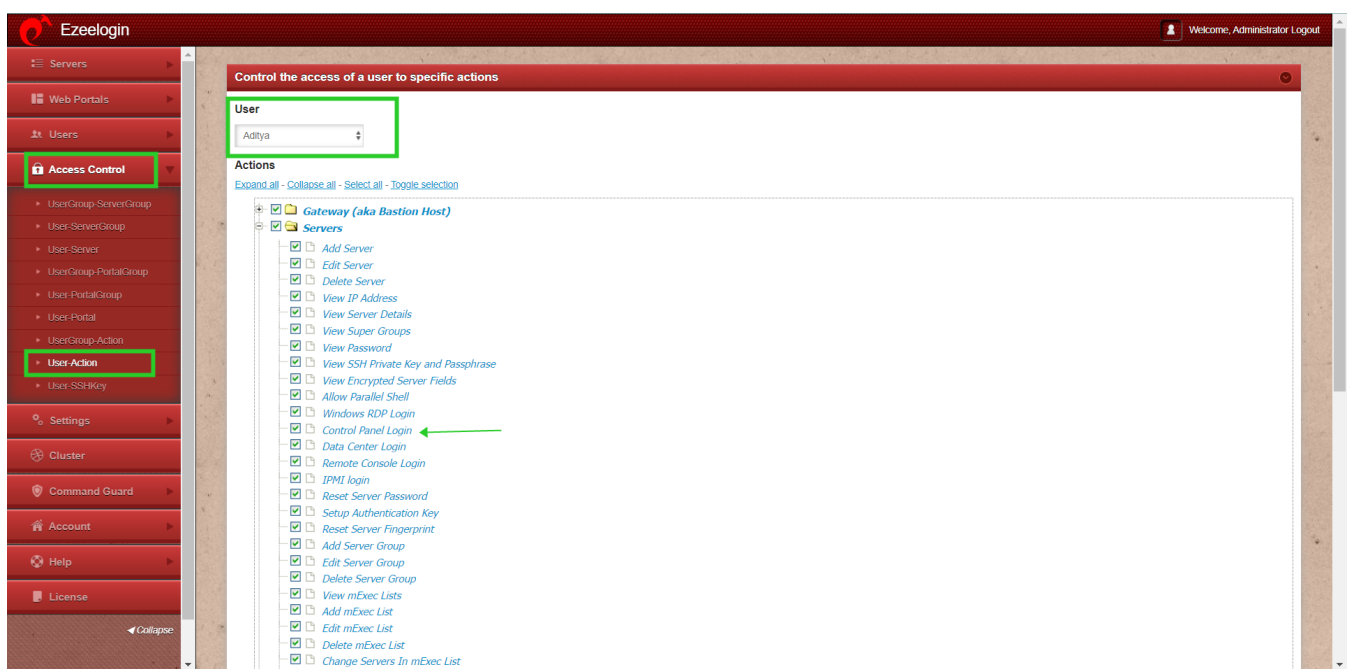

[Control Panel](#) is a web-based interface that are used for server management. Examples of control panels are Cpanel, Plesk, Webmin, etc. For adding a control panel Request URI is enough. Control panel is needed to add once, also we can select the control panel at the time of adding or editing server, When we are accessing the control panel it uses the details of the server to which the control panel added.

You can add [direct admin](#) as ControlPanel.

How can you grant access to Control Panel for users

You can use the [access control](#) to grant control panel access to the users.

Access Control -> User Action->Severs->Control Panel login
