Upgrade to php version 8.2 in SUSE Linux Enterprise Server 15

HOW TO UPGRADE PHP TO 8.2 IN SUSE Linux Enterprise 15(SLES)

SUSE Linux Enterprise Server (SLES) is a Linux-based server operating system created and maintained by the German-based organization, SUSE. It is part of the enterprise product family and is designed for server environments known for its stability and comprehensive support for enterprise workloads.

1. Add PHP Repository for PHP 8.2 packages and refreshes the package manager's data.
    Run the following command

```
Fo
r  S
LE 15 SP
6  run the follo
wing as  root :
```

For SLE 15 SP5 run the following as root :
zypper addrepo https://download.opensuse.org/repositories/devel:languages:php/SLE_15_SP5/devel:languages:php.repo zypper
 refresh For SLE 15 SP4 run the following as ro
ot :
zypper addrepo https://download.opensuse.org/repositories/devel:languages:php/SLE_15_SP4/devel:languages:php.repo zypper refresh

2. Install PHP 8.2 from the added repository:

```
root@gateway:~# zypper install php8
```

3. Check the PHP Version. This should display the version of PHP you installed.

```
root@gateway:~# php -v
```

```
ec2-user@ip-172-31-9-146:~> php -v
PHP 8.2.15 (cli) (built: Jan 18 2024 12:00:00) (NTS)
