Hide the server details for a particular user group or user 679 Lekshmi April 21, 2025 <u>Features & Functionalities</u> 1130

## How to hide the server details for a particular user group or gateway user ?

**Overview:** This article describes how to hide the server details for a specific gateway user or user group within the Gateway by configuring the Access Control settings.

To hide server details for a specific Gateway user group or user, navigate to the "Access Control" section, then proceed to "User-Action/user group" and disable "View Server Details".

Step 1: To conceal the server details from a gateway user, uncheck 'View Server details' under Access-Control >> User-Action >> Server. Refer the below screenshot.

Step 2: To hide the server details from a user group, uncheck 'View Server details' under Access-Control >> UserGroup-Action >> Server. See the screenshot below for reference.
