How to implement themes for your interface design 691 Rakhi April 24, 2025 Features & Functionalities 1380

How can you set the login page themes, background, GUI themes and login page notice in web GUI?

Overview: This article describes how to customize the Ezeelogin web GUI by setting login themes, background images, GUI themes, logos, and titles for the login page, web panel, and terminal to enhance user experience and branding.

1. Add a theme to the login page of WebGUI.

The following steps would reflect globally on all users.

Step 1(A): Navigate to **Settings > General > Miscellaneous > Login theme** parameter > choose any of the options given (**white/Dark/Wood/Papyrus**) and Save it.

2. A sequential guide to adding a theme to the webGUI pages.

Step 2(A): Navigate to **Account > Theme >** choose the listed themes and set them as default. (Smooth, Papyrus, sky, white, wood, Green glow)

Setting them as the default will apply changes globally to all users.

Step 2(B): If you opt not to set it as the default theme, changes will only affect individual users.

3. Set logo in Ezeelogin web panel

It is also possible to incorporate a logo into the Ezeelogin Panel and include your brand name for branding purposes.

The following steps would reflect globally on all users.

Step 3(A): Navigate to **Settings > Branding > Add logo** by choosing the file from your desktop and then upload it.
