View and export web proxy logs and web proxy activity logs in Ezeelogin

Overview: This article explains how to view and export Web Proxy Logs and Web Proxy Activity Logs in Ezeelogin, including enabling logging and using filters for detailed tracking.

This article provides an introduction to **web proxy logs** and **web proxy activity logs**, explaining what they are and how to view them.

1. What is Web Proxy Log and how to access it?

The **web proxy log** is a log file that keeps track of the activities and requests made through web proxy feature in Ezeelogin. It provides comprehensive information about all access to the web portal via the reverse proxy.

To view Web proxy log navigate to Users -> Web Proxy Log -> Find. The Web Proxy Log records all access to the webportal via the reverse proxy.

User : Specify the user name whose logs has to be searched

Webportal : Select the web portal

From : Select the start date & time

To : Select the end date & time.

Rows per Page : Number of rows of results to be displayed per page

Export : Export the search results as a csv document

Reset : Clear the search parameters

Find : Use it to search the activity logs

2. How to export Web Proxy Log?

You can download all the web proxy logs of the users in .csv format by clicking on export.

3. What is Web Proxy Activity and how to access it?

The **Web Proxy Activity Logs** provide comprehensive information about user access details to the web portal using the reverse proxy.

To view web proxy activity first navigate to **Settings -> General -> Security -> Enable Web Proxy Logging.** Enable **Web Proxy Logging** for the recording of Requests and Responses via Web Proxy.

Request : Record webproxy requests.

- **Response :** Record webproxy responses
- Both : Record both.
