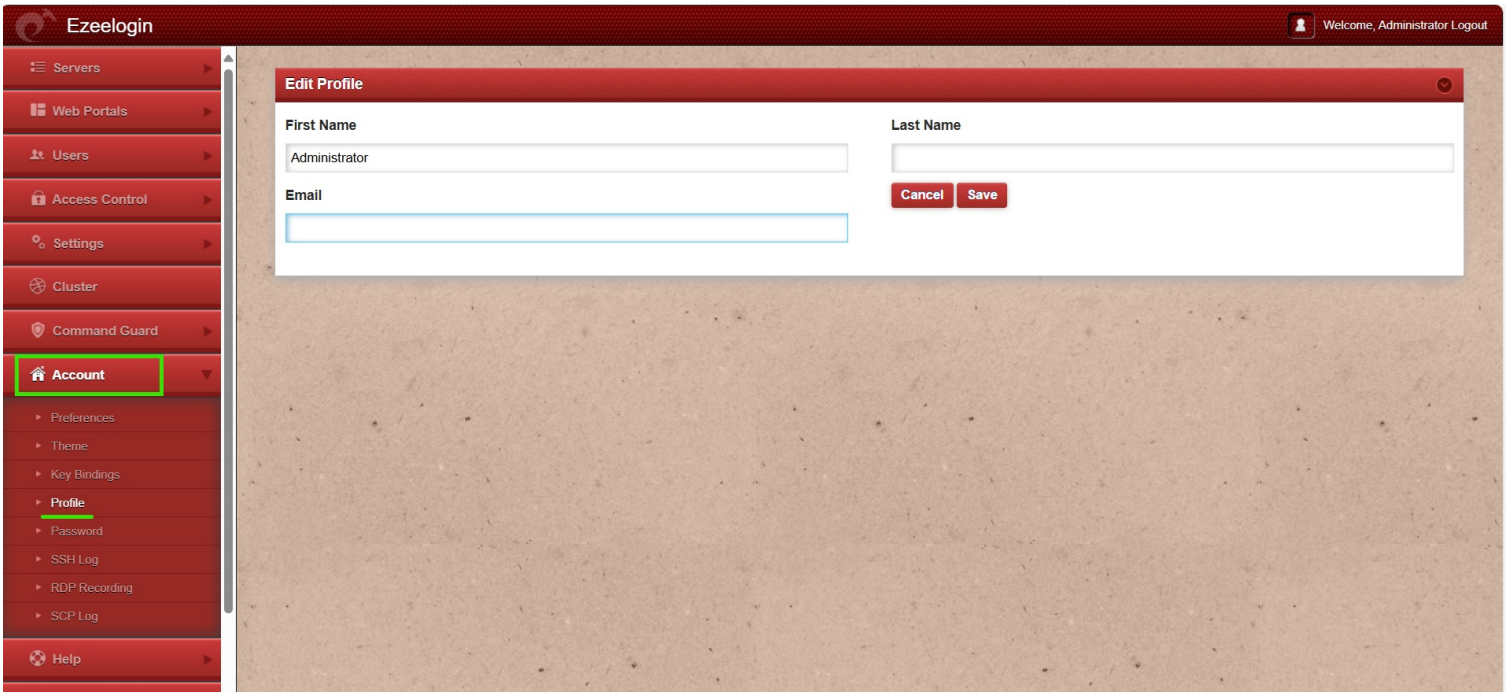
How to modify a user profile

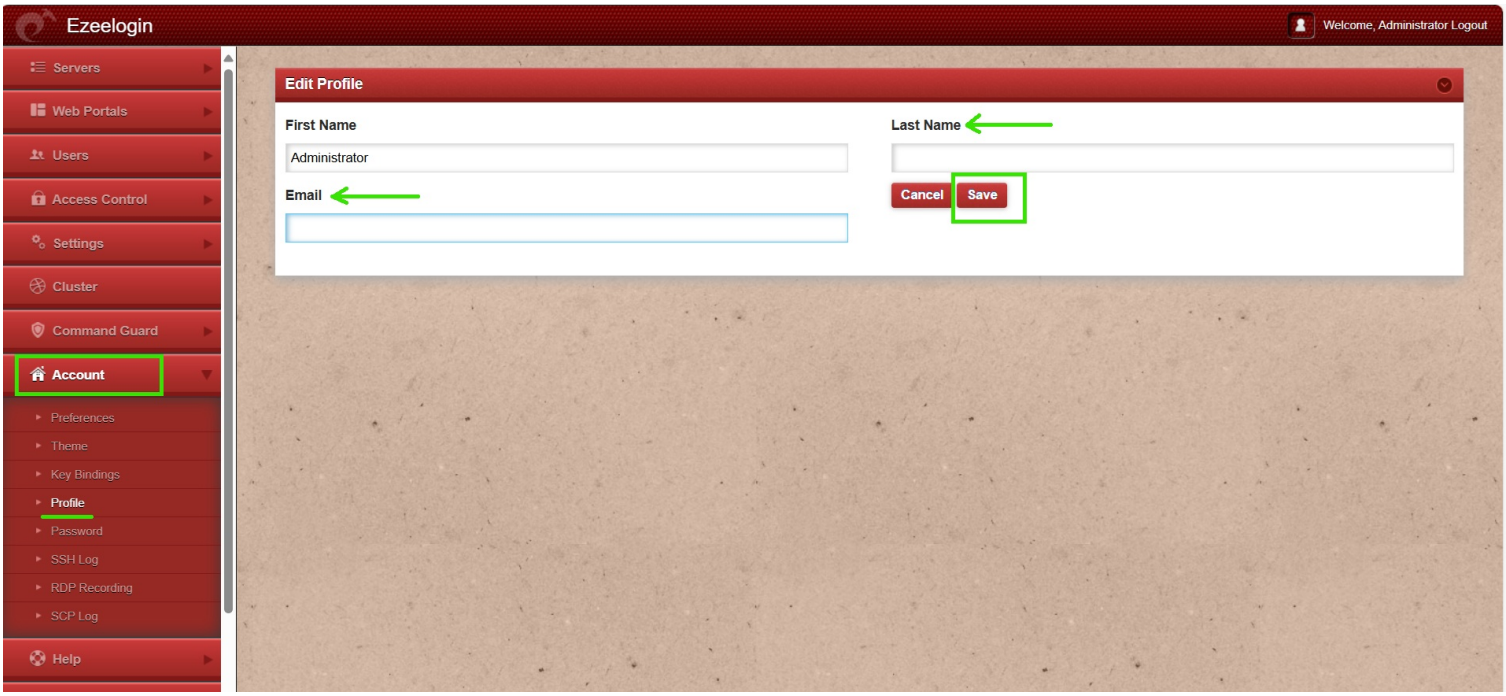
Overview: This article explains how to view, modify, and update user profile details in the Ezeelogin GUI.

Profile : To view/edit current user profile.

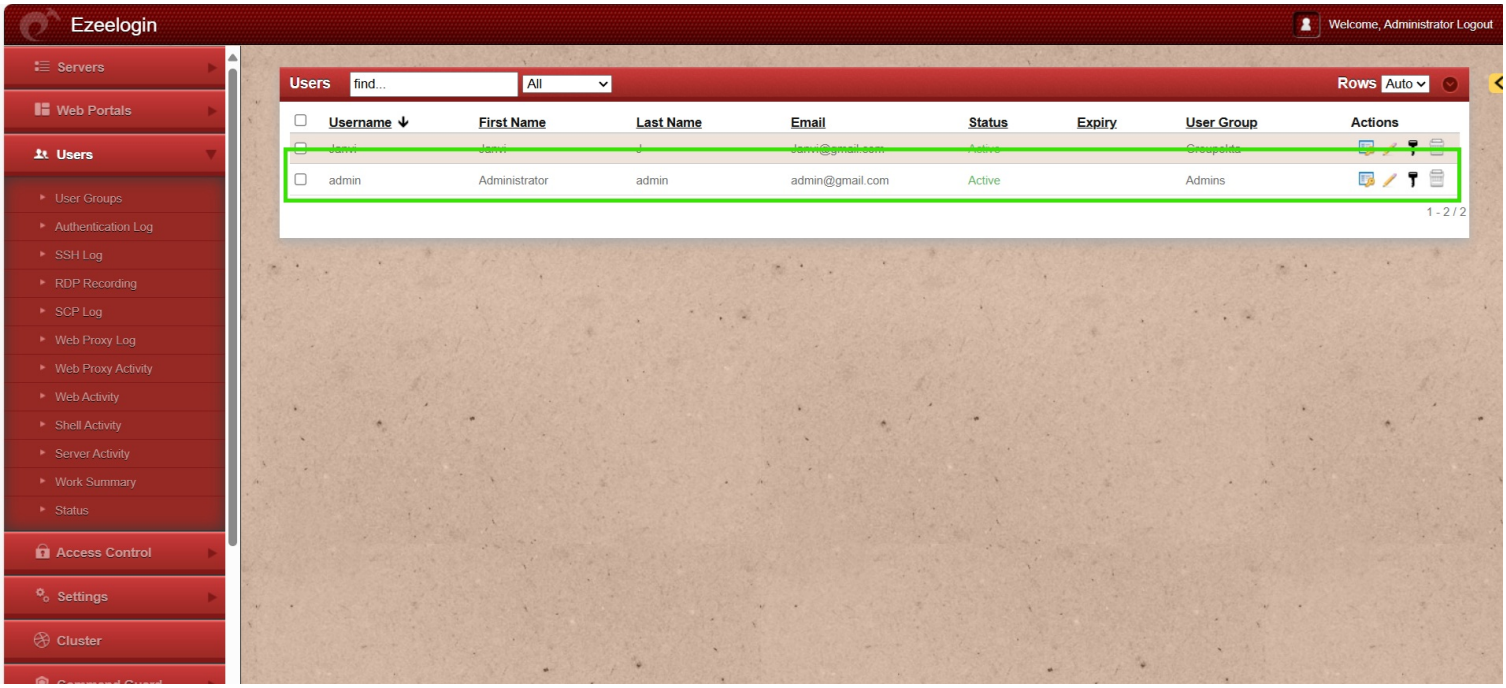
To update or edit the details of a user, go to the **Account -> Profile** tab



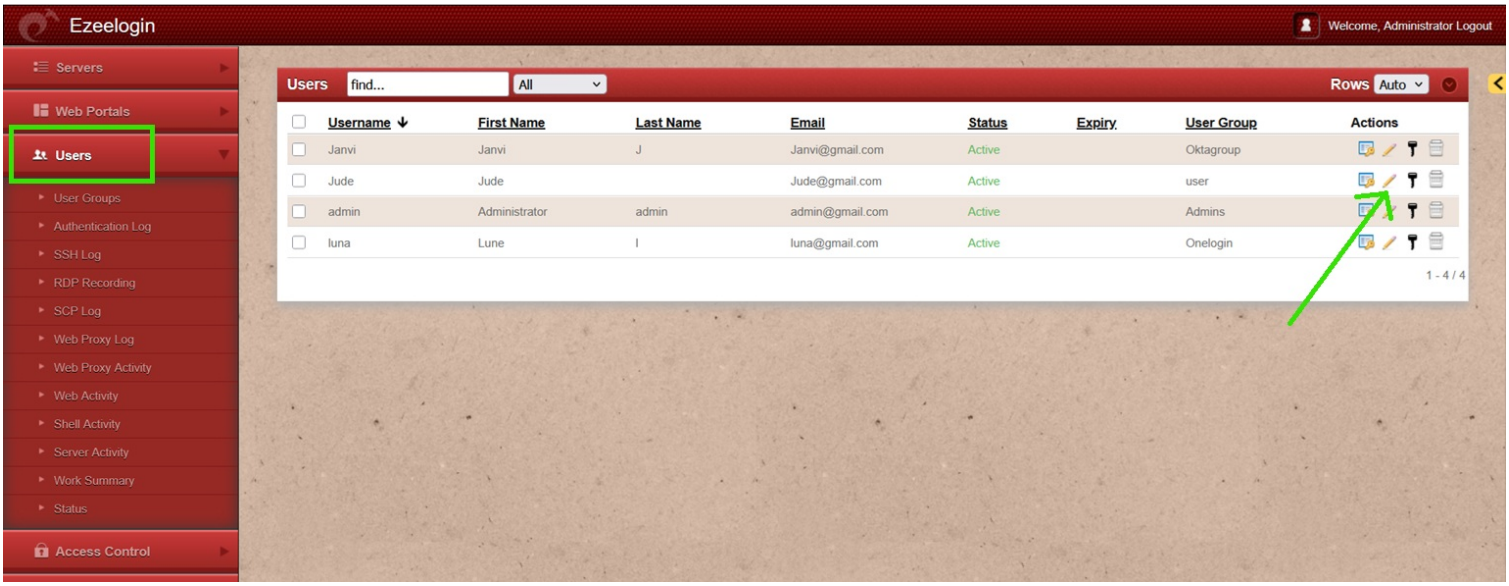
Here, update the user's(here logged in as Administrator) **last name** and **email**, then **click "Save."**

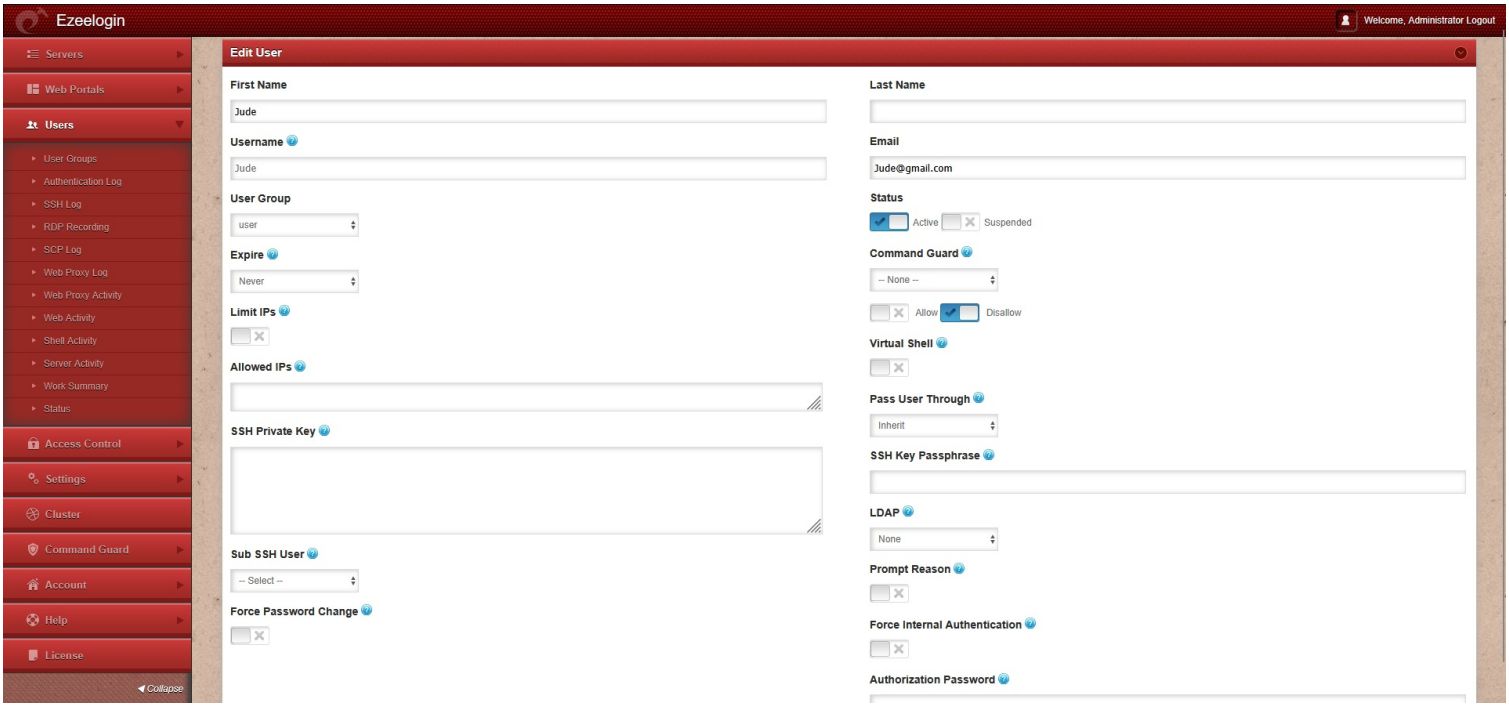


After saving, the Administrator account details will be updated as follows:



User profile modify can also be made using the **Edit Icon in the Users tab**(refer the below screenshot)





Profile modifications can be made for any Ezeelogin GUI users by logging in as the respective user through the GUI(Refer below screenshot).
