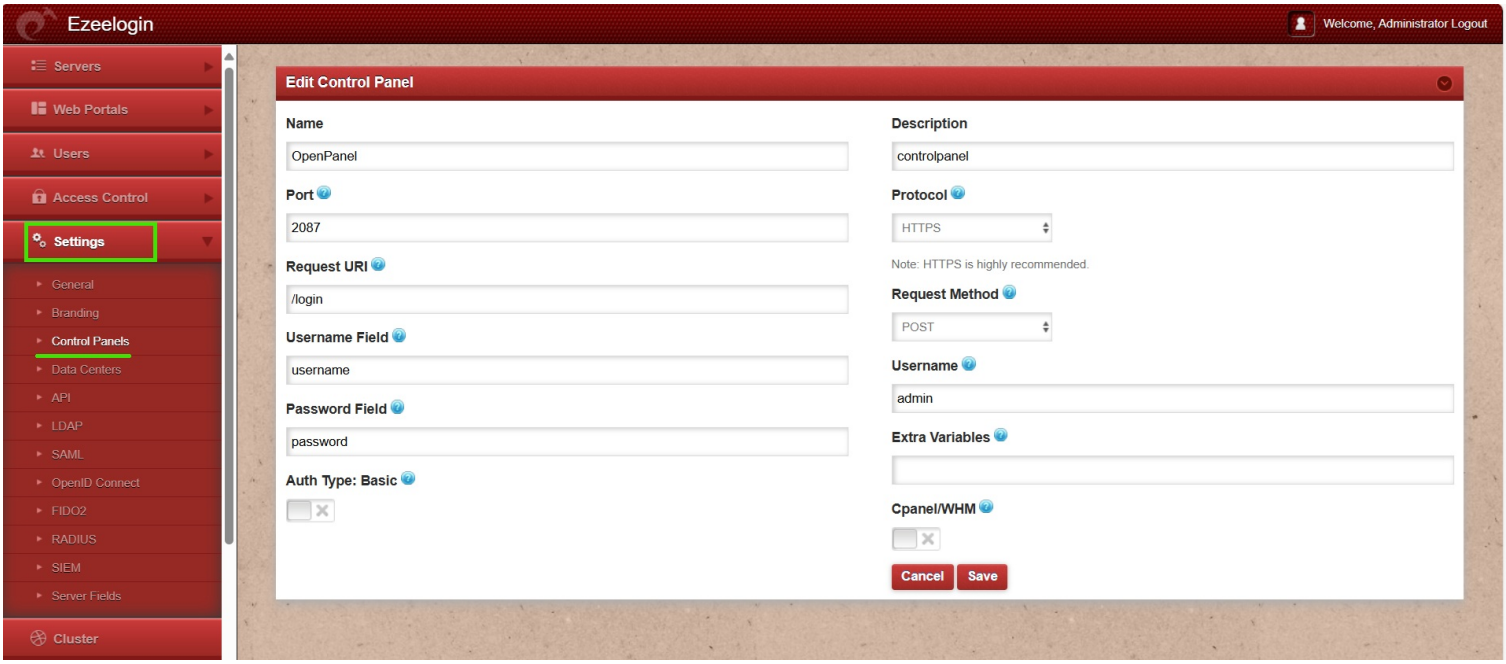
How to add OpenPanel as Control panel

Overview: This article explains how to integrate OpenPanel as a control panel with Ezeelogin, covering the steps for configuration in the Ezeelogin GUI and instructions on accessing the control panel afterward.

This feature is available only from Ezeelogin version 7.37.11. To avail this, **upgrade** Ezeelogin to this version.

Step 1: To add the control panel, Loginto Ezeelogin GUI interface and navigate to Settings > Control Panels and make sure to fill the form as follows. Refer to the below screenshot.



Make sure to disable the cPanel/WHM option while adding OpenPanel.

Step 2: Navigate to **Servers tab** and choose the added control Panel from the drop down menu. **Note that If the control panel is installed on another/seperate server, make sure to provide the control panel details under Advanced section. Mention ControlPanel user, ControlPanel password, and CPhost details.** Then click on "Save."

Step 3: Access the control panel after saving.
