How to add SolusVM as ControlPanel

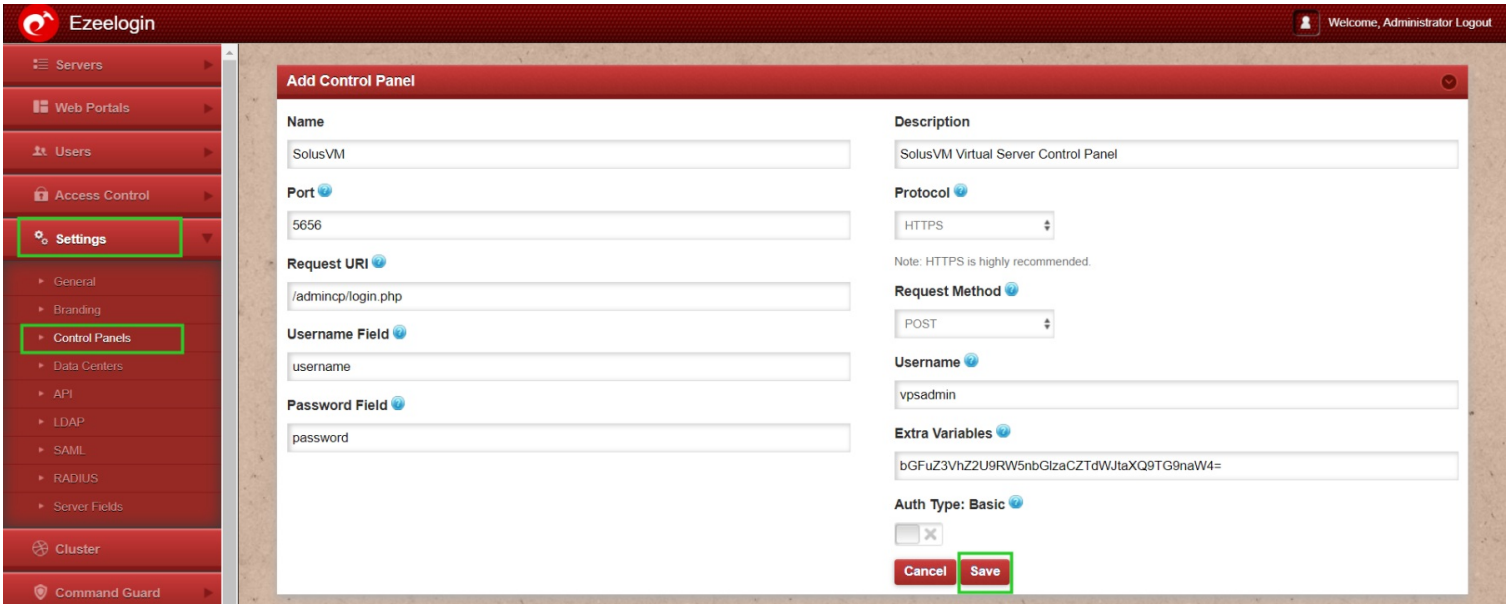

Overview: This article explains how to set up SolusVM as a control panel in Ezeelogin, including steps to configure it in the web GUI and how to access it afterward.

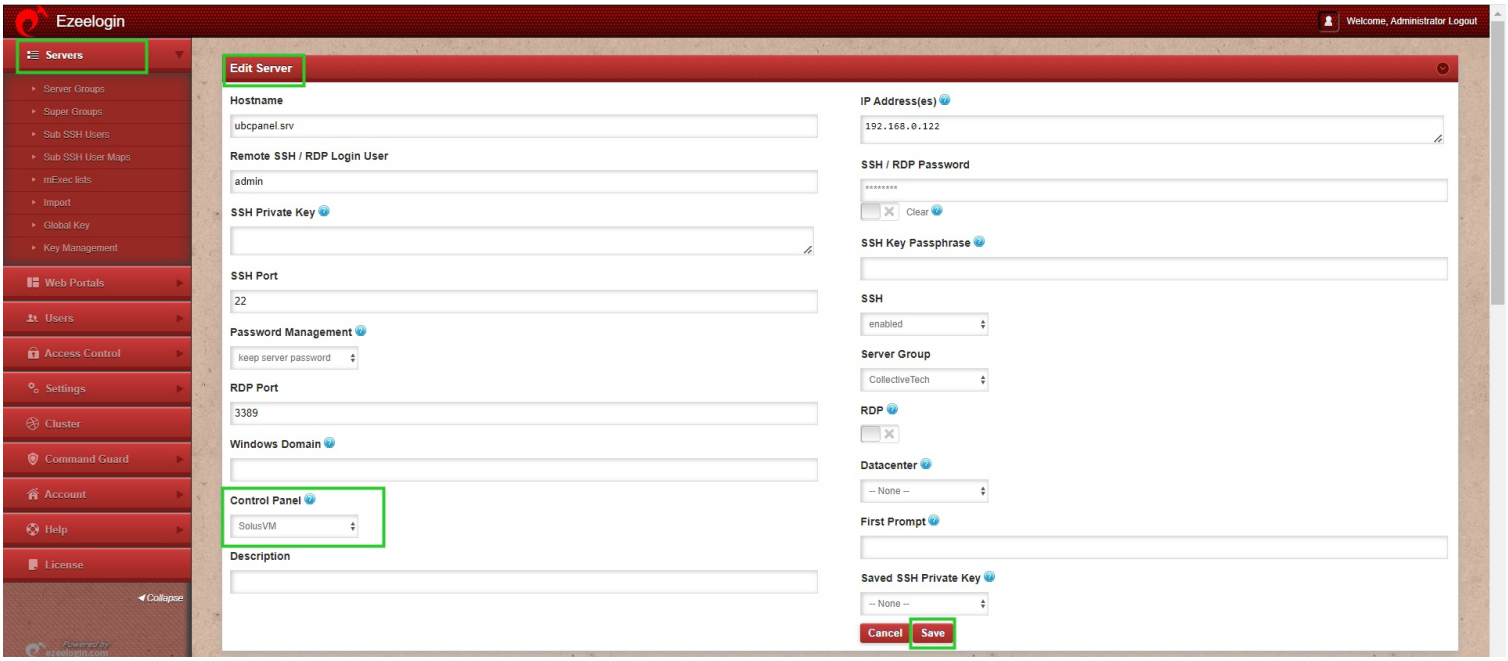

Step 1: Setup **SolusVM**.

Step 2: After setting up SolusVM, login to web GUI and navigate to **Settings** -> **Control Panel -> Add SolusVM.** Refer below screenshots as an example to configure SolusVM.

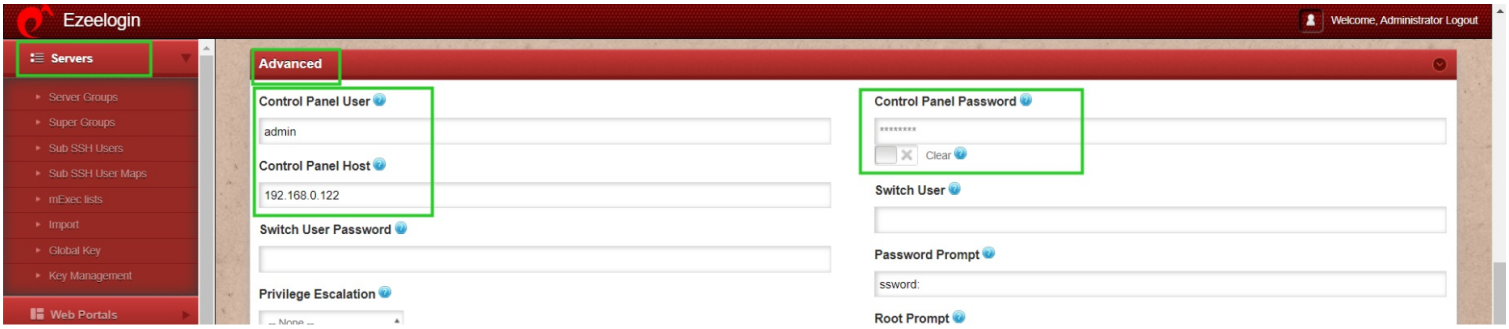

Step 3: After Adding the ControlPanel accordingly, navigate to servers tab and select the control panel SolosVM from the drop down as shown below:

Step 4: If the control panel is installed on another/seperate server, make sure to provide the control panel details under advanced section. Mention **Control Panel user**, **Control Panel password**, and **Control Panel Host** details. Then click on "**Save**." Refer to the screenshot below as an example:

Step 5: Grant access to the Control Panel for non-privileged users.

Step 6: Click on the control panel icon to access SolusVM.
