Map Google SSO attributes to Ezeelogin 758 Nesvin KN May 9, 2025 <u>Productivity & Efficiency Features</u> 677

How to map Google SSO attributes to Ezeelogin?

Overview: This article will help Ezeelogin admin users to map attributes with Google SSO.

Step 1: Log in to the **Google Workspace Admin console** and select the Ezeelogin application from **Apps > web and mobile apps.**

If a user exists in multiple user groups, then the user will import to the user group having a higher priority.

Example: Consider a user named Marc who is a member of both the devopsteam & systemteam. If systemteam is assigned a priority of 5 and devopsteam a priority of 3, Marc will be imported into the systemteam user group because it holds the higher priority 5.

Step 6: Relogin to Ezeelogin GUI with Google SSO user credentials.
