

## What setting to be changed in jump server configuration file if mysql is listening on a different port?

8 admin May 8, 2018 [Tweaks & Configuration](#) 5215

What setting to be changed in ezeelogin jump server configuration file if mysql is listening on a different port?

Edit the variable db\_port in **/usr/local/etc/ezlogin/ez.conf** and set the port number.

Also you may want to change the **db\_host** value from localhost to the ip address.
