Duo health check failed: invalid_client: Invalid Client assertion: Token has expired

809 Jisna Joseph March 22, 2026 Common Errors & Troubleshooting 1343

How to resolve error: Duo health check failed: invalid_client: Invalid Client assertion: Token has expired?

Overview: This article explains how to resolve the error "Duo health check failed: invalid_client: Invalid Client assertion: Token has expired" by correcting and synchronizing the time on the gateway server

The above error is almost always caused by time mismatch on the gateway server. Run below command to check the server time

```
root@gateway:~# date
```

If the time time is not synced correct the server time
