Adding PHPIPAM as webportal

830 Nesvin KN November 4, 2026 Productivity & Efficiency Features 222

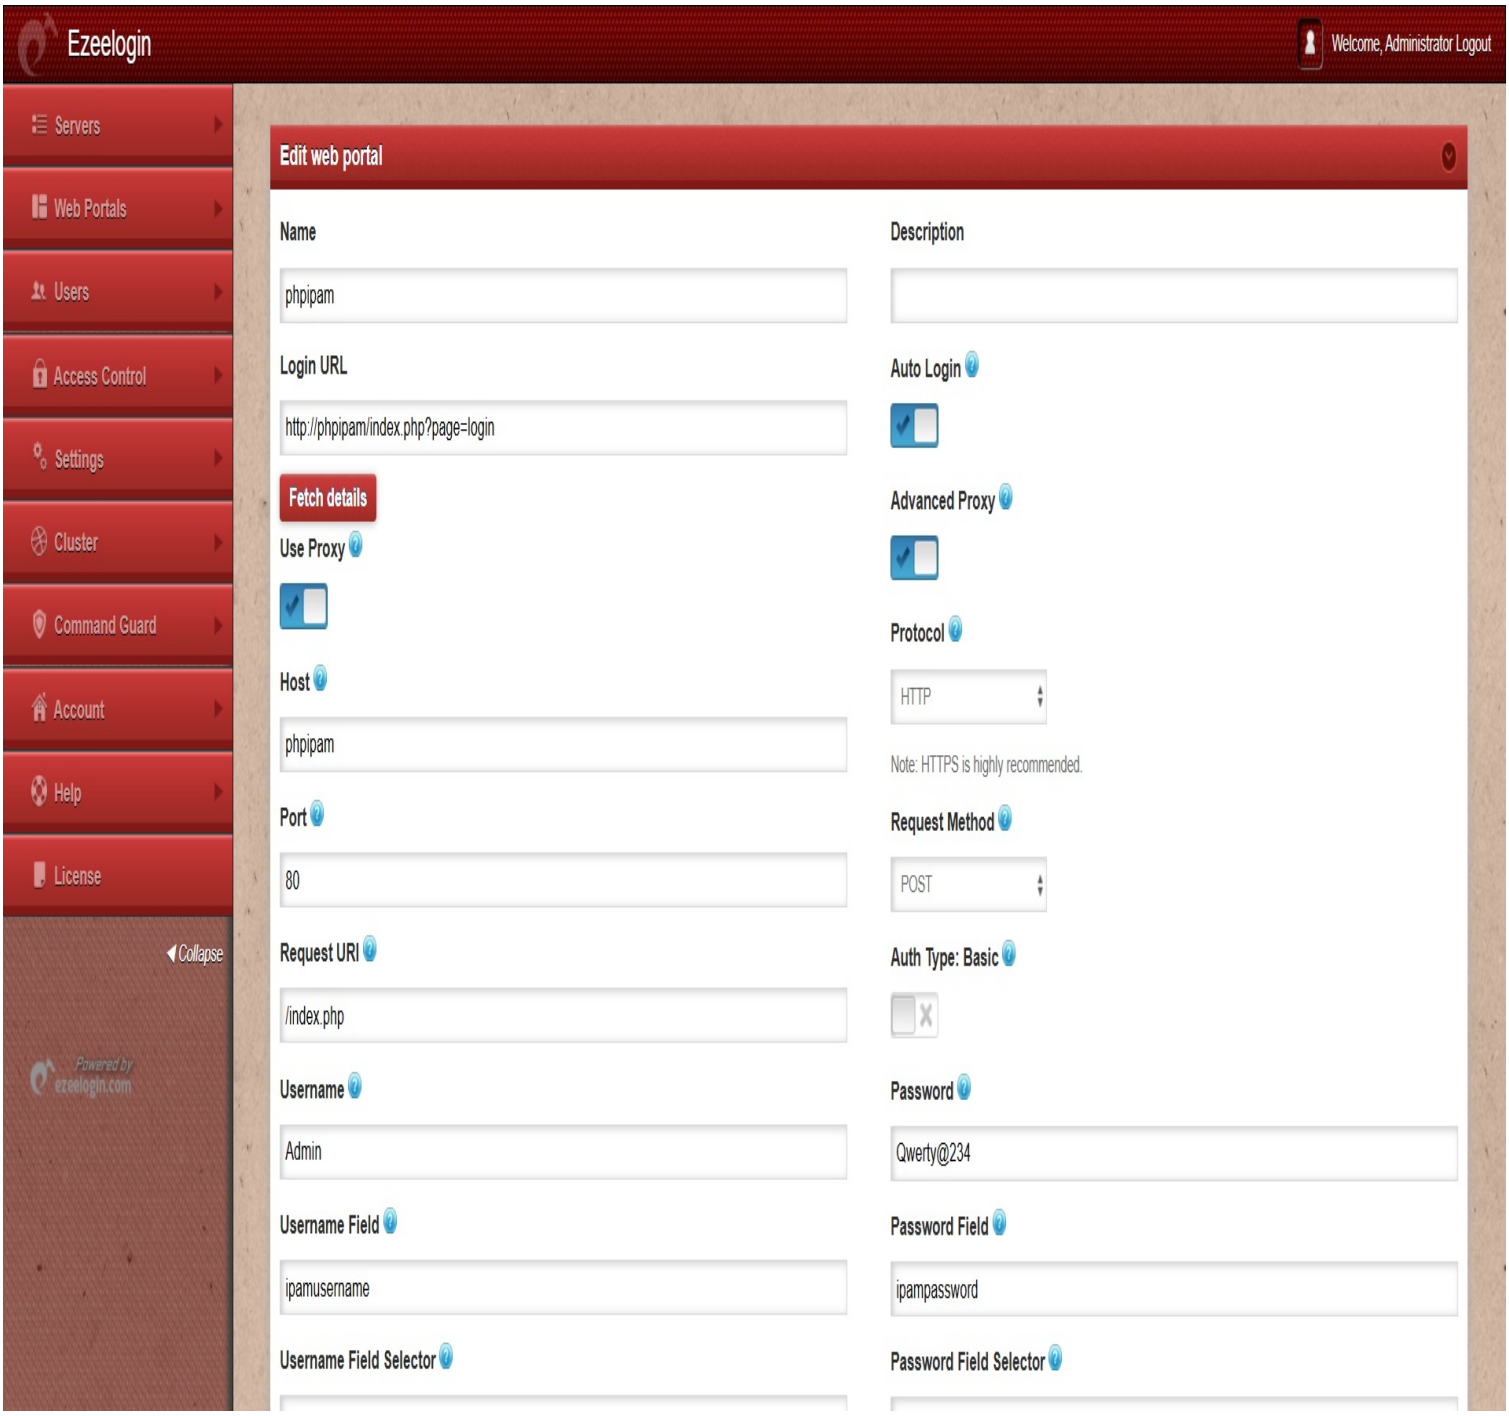

How to add PHPIPAM as webportal in Ezeelogin?

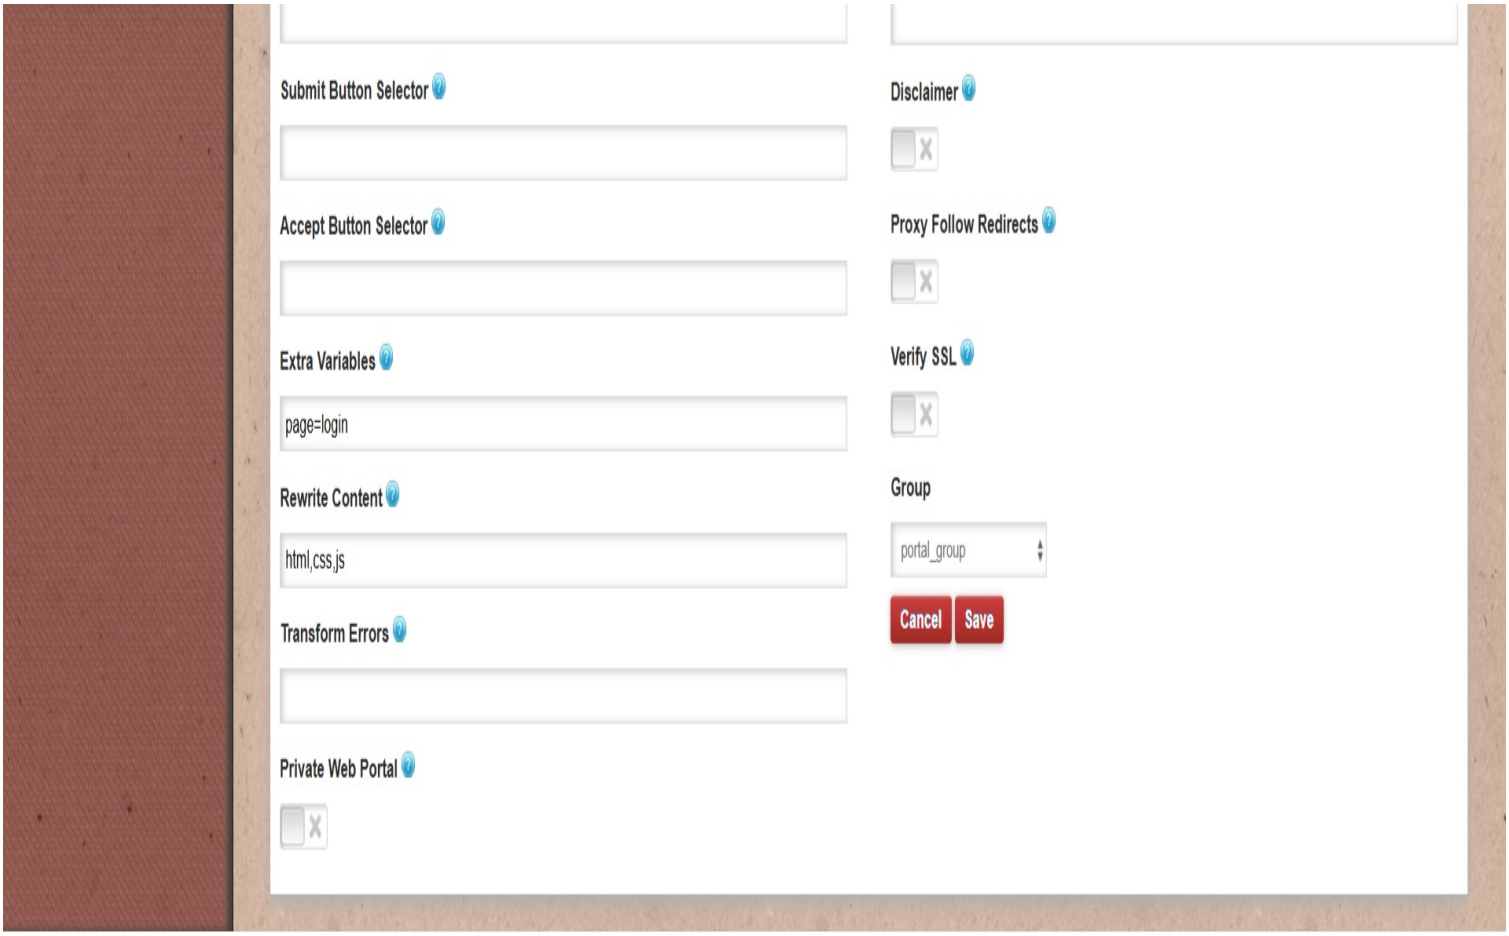

Overview: This article explains how to integrate PHPIPAM as a web portal in Ezeelogin. It provides instructions for adding PHPIPAM to the Ezeelogin web portal and configuring autologin settings.

Note: This feature requires **Ezeelogin 7.48.1 or later**. Not sure which version you have? Check it in the Ezeelogin UI. If you're on an earlier release, upgrade Ezeelogin first.

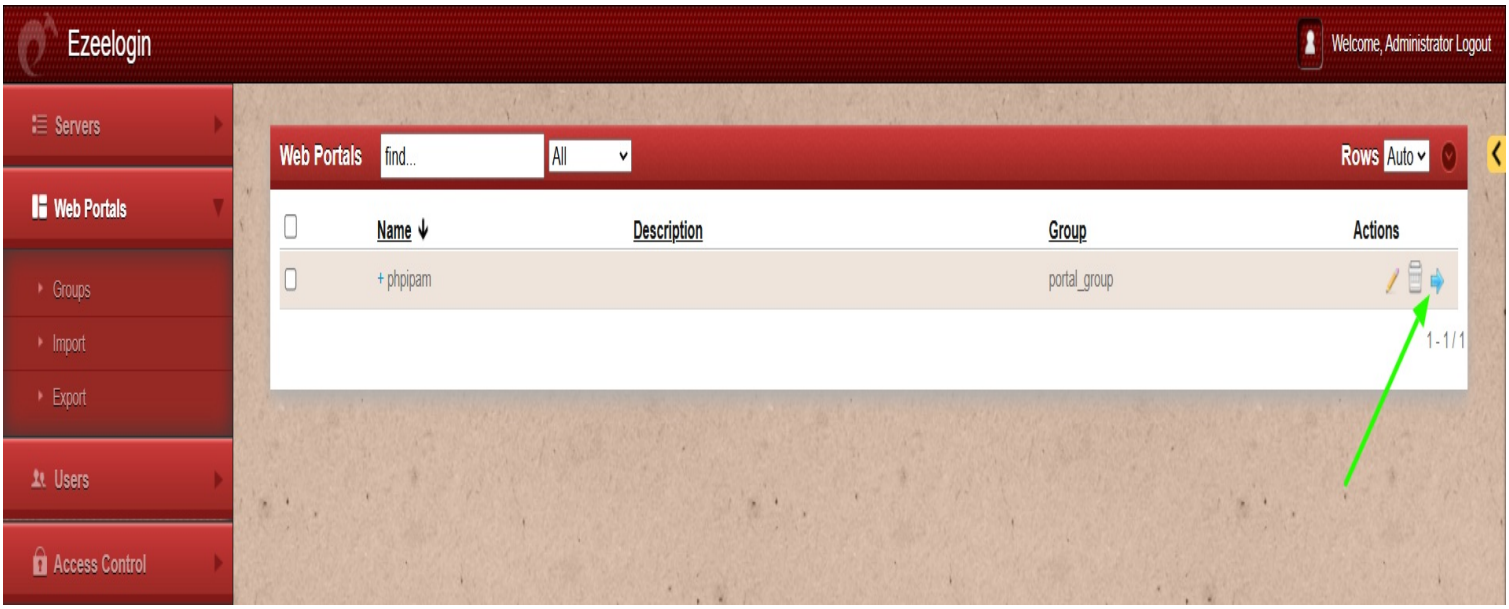

Note: Make sure web portal proxy is configured in Ezeelogin. Refer below detailed article: **Setup web portal proxy in Ezeelogin**

1. Refer to the **PHPIPAM portal settings** below and ensure that all fields are filled in as shown in the reference screenshot.

2. Click on the **login icon to auto-login to portal**
